BoMar Agra Estates

WHITEPAPER v1.0

# INTRODUCTION

Our journey was the answer to a simple question. What would happen if a cryptocurrency project backed by Cannabidiol (CBD) and Marijuana (MJ) Cultivator while being USDA Certified Organic was 100% run by the project and its community? While the term DeFi literally includes the word decentralized, this is in reference to economic status as opposed to its internal hierarchy.

Projects built on the foundation of community involvement in the cannabis space along with advancing and evolving into our future. As we move further away from rigid financial structures and traditional mindsets, we become free to discover new ways to solve problems and relate to one another.

In a world ruled by the commodification of time, community-run projects along with a company are more than just a change of pace, they are a way to practice the radical acceptance of others. When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us, which is called freedom.

The Bomar Token Ecosystem introduced on the behalf of Bomar Agra Estates (we are Cultivators) is our way of recognizing the importance of tearing down this long-established paradigm in the cannabis industry since both CBD and MJ have numerous beneficial values not fully explained in college and universities studies.

By studying those drawn to our project for every walk of life, we realized that true strength doesn't come from one of us alone, it comes from when we work together in harmony. With that thought bright in our minds, we began developing the Bomar Token Ecosystem in earnest which is backed by our dedication as farmers, people, botanists, and scientists.

"Our goal is to bring the best and the most organic cannabis plant to the market."

— Bo O.
CEO

# BOMAR ECOSYSTEM

We are dedicated to building the best Decentralized Ecosystem (DECO) that benefits the general public in regards to the Cannabidiol (CBD) and Marijuana (MJ) marketplace and circling it back to the farmers to further evolve the industry. Our three tokens are the pillars of the Bomar Token Ecosystem sprouted, and along with BomarSwap is how we will dig in our roots back to the earth.

Our three tokens (Bomar Agra: **$BOMAR**, Greenhouse: **$GREEN**, Hempcrete: **$CRETE**) are the beginnings from the Bomar Ecosystem Tokens and BomarSwap is how we kept to our farming (swap, staking and pairing) roots. The purpose of the cryptocurrency exchange swap is the general public can exchange, stake, pair or swap tokens for a slippage fee of six percent (6%), which the fee will be allocated back to the Ecosystem's Development Wallet.

The users can become liquidity pool providers called (pairing), supplying an equal value pair of two cryptocurrencies (e.g. WETH/BOMAR) in order to receive $CRETE token rewards whenever anyone utilizes that pool. The users can also SWAP tokens, to exchange one token for another

Our unique tokenomics structure, design, technical implementation, and viral growth from numerous marketing avenues, word-of-mouth and dedication to the cannabis plant will reinforce the platform's strength and ultimately provide residual benefits to the Ecosystem.

BomarSwap will highlight our three (3) tokens:

**BOMAR TOKEN**: $BOMAR = (1,200,000,000 Token Supply)

**GREENHOUSE TOKEN**: $GREEN = (105,000 Token Supply)

**HEMPCRETE TOKEN**: $CRETE = (250,000,000 Token Supply)

# BOMAR TOKENOMICS

On the BomarSwap, users will be able to use BOMAR Tokens to PLANT (staking) or to HARVEST (pairing) for in return for CRETE token rewards. Cryptocurrency (staking) is the process of the user locking up BOMAR token holdings in order to obtain CRETE token rewards. The users can become liquidity pool providers called (pairing), supplying an equal value pair of two cryptocurrencies in order to receive CRETE token rewards whenever anyone utilizes that pool. The users can also SWAP tokens, to exchange one token for another.

**BOMAR TOKEN:** $BOMAR. The Bomar ($BOMAR) is for this minting of one billion two hundred million tokens (1,200,000,000) of $BOMAR, the beginning fifty percent (50%) of the tokens, six hundred million (600,000,000) tokens will be split into six (6) cryptocurrency wallets, 100,000,000 tokens each in three (3) Developer wallets, one (1) Operations wallet, one (1) Marketing wallet and one (1) Development wallet. The other fifty percent (50%) of the tokens, which is six hundred million (600,000,000) tokens, of which two hundred million (200,000,000) tokens will be transferred on UniSwap Protocol for the general public to purchase and sell, and the remainder of four hundred million (400,000,000) tokens will be in one (1) Corporate Wallet for future cannabis or token development initiatives or for future DEX listings.

**GREENHOUSE TOKEN:** $GREEN. The Greenhouse ($GREEN) is the second token in the BOMAR Ecosystem, as a simple ERC-20 Token. Whereas the supply of Greenhouse ($GREEN) is one hundred and five thousand (105,000) minted tokens. For the Greenhouse token, ten (10%) percent tokens, ten thousand five hundred (10,500) tokens split into six (6) wallets,1,750 tokens for each in three (3) Developer wallets, one (1) Operations wallet, one (1) Marketing wallet and one (1) Development wallet. The other ninety (90%) percent of the tokens, ninety four thousand and five hundred (94,500) tokens will be transferred to UniSwap Protocol for the general public to purchase and sell.

**HEMPCRETE TOKEN:** $CRETE. The HempCrete ($CRETE) is the third token in the BOMAR Ecosystem, it will only be able on BomarSwap in the beginning 2023, $CRETE Tokens has two hundred fifty million (250,000,000) minted tokens, and is designed to be in-between token of $BOMAR and $GREEN. The Hempcrete token is a Governance token, a Decentralized Finance (DeFi), which will allow the public to vote on any proposals we present for 2023, and which token pairs will be added in the BomarSwap.

# BOMAR ROADMAP

As some parts of our roadmap will remain top secret to ensure our continued advantage in this highly competitive space, but releasing a simple overview to the general public will allow our holders to understand the intentions of the core team, developers or owners.

## Q1 - 2022

Website launched (BomarToken.com) and Ethereum ERC20 token launched with a confirmed trading pair and liquidity injection on UniSwap. Marketing and ad campaigns started.

## Q1 - 2022

Begin development of the marijuana production from the County and State Licenses. Begin building the marijuana strains to create a more straightforward process for buying, selling, and holding $BOMAR cryptocurrency and other cryptocurrencies in our platform. Ramp up community marketing and outreach.

## Q2 - 2022

Create a hempcrete division to present hemp products, such hempcrete, hemp plywood, hemp drywall, and hemp foam insulation.

## Q3 - 2022

Rebuilding SunnyLabs online presence, from website, social media, and building the SunnyLabs platform for the leader in CBD Oil. In addition, to developing new product offerings to the public within the SunnyLabs ecosystem.

## Q4 - 2022

Introducing the BomarSwap.com so our three tokens ($BOMAR, $GREEN and $CRETE) for pairing, staking in return for $CRETE rewards.

## Q4 - 2022

Introduced marijuana strains for recreational and medical usage. Since recreational strains are more popular in the summer months, and medical strains are more popular in the winter months.

# CONCLUSION

The Bomar Ecosystem started with the planting of the seeds of an idea. What could happen with with no centralized infrastructure, no funding from outside sources, and no direct leadership? As we make it our mission to bring awareness to the general public, companies, universities and major industries about Cannabidiol (CBD) and Marijuana (MJ) plants.

And even from the beginning George Washington pushed for the growth of hemp as it was commonly used to make rope and fabric. In May 1765 he noted in his diary about the sowing of seeds each day until mid-April. Then he recounts the harvest in October which he grew 27 bushels that year.

This is just the beginning of a new era for decentralized communities and ecosystems. When the time is correct, BomarSwap will be one of the many crucial point of contact between the decentralized finance industry and the global communities, allow us to come to fruition our vision of widespread adoption of DeFi cryptocurrency within the Cannabidiol (CBD) and Marijuana (MJ) space.

In conclusion, we (Bomar Agra Estates) would like to say thank you to each and everyone of you for being a pioneer in connecting the world with the cannabis plant and its benefits. Without your partnerships and word-of-mouth marketing, none of this would be possible.

"This plant is amazing and bringing this to people, is an honor."

— Mark T.
   COO
